HIGH PRECISION COOLING SOLUTIONS FOR DATA CENTER AND TECHNOLOGICAL ENVIRONMENTS

POWERED BY

**EMICON**  
CLIMATE SOLUTIONS

Mission critical cooling & Thermal management has been Emicon core focus since 1984 Our range of precision air conditioning solutions have been designed for a wide range of applications where close control, high precision cooling is essential, including data centres, telecom switching stations, theatres, museum and high technological density environments in general Throughout its history, the data center and server room has consistently been asked to do more handle more capacity, deliver more availability and achieve more efficiency Thanks to the resourcefulness and dedication of the people responsible for managing these business-critical facilities, they have largely responded The question now is can they continue to do so within the existing paradigms, or are we on the verge of fundamental changes in data center technologies, designs and processes?

# KNOWLEDGE AND CONSOLIDATED ITALIAN QUALITY AT THE CENTER OF YOUR DATA

The result to this main question nowadays is EMICON EMIBYTE , the new partner in IT cooling with his new series of products entirely designed and produced in the Emicon factories, Reliable, integrated cooling, from chiller and computer room air conditioners, tackles the issues head on to lower costs and reduce downtime risk We provide all levels of heat removal for different sized rooms and applications Whether you're building new, retrofitting, or modernizing, achieve a healthy data center environment with our EMIBYTE cooling solutions

## DIRECT EXPANSION UNIT, AIR COOLED WITH ON/OFF COMPRESSOR

Close control air-conditioners for vertical installations and cooling only, with optional heating by means of heating element, optional humidifier and dehumidifier for precise temperature and humidity control. Particularly suitable for precision air conditioning in servers and IT rooms and all technological applications in general. Units fitted with EC Inverter fans, up flow or downflow External air condenser Emibyte equipment are fully designed and tested in the Emicon validation laboratories.

### CONTROL

Semi-graphic display 132x64 pixel, programmable software, record storage of 200 alarms, general alarm, automatic reset after blackout, integral LAN system, standby management, automatic rotation, serious alarms, operating contemporaneity, clock function modality

### FEATURES

Unit for installing inside or outside the room to be air-conditioned. Maximum resistance to rust thanks to the galvanized sheet metal structures and panels with bevelled corner uprights to enhance its unique, clean and attractive design. The panels are lined with sound-insulating material to limit noise levels. New generation EC Inverter centrifugal fan made in high class technological material with 5 backward curved blades. Impeller with bionic 3D profile thanks to an innovative design in the form of a blade geometry with specific buckling. Special V-shaped rear edge allows a wide characteristic field. Together with the rotating diffuser that opens, exceptional performances of the impeller and the entire system are thus obtained. In combination with the undulated surface of the blade surface, a diffused sound emission takes place which guarantees a very low noise level. Standard COARSE 60% (ISO EN 16890) EU4/G4 filtering section installed. The filter is self-extinguishing. The microprocessor controls the compressor activation times thereby regulating the cooling capacity, it also controls the operating alarms with the possibility of interfacing to supervisor and remote-servicing systems. Refrigerant circuit consisting of Electronic Expansion Valve, sight glass filter dryer on liquid line, pressure transducer with indication, control and protection functions on low and high refrigerant pressure, high pressure safety switch with manual reset, liquid receiver with accessories.

### VERSIONS

D - DOWNGRAPHIC DISPLAY  
U - UP FLOW AIR SUPPLY  
F - FRONT SUPPLY (DISPLACEMENT)  
B - UP SUPPLY, REAR RETURN

### ACCESSORIES

## DIRECT EXPANSION UNIT, AIR COOLED WITH INVERTER COMPRESSOR

Close control air-conditioners for vertical installations and cooling only, with optional heating by means of heating element, optional humidifier and dehumidifier for precise temperature and humidity control. Particularly suitable for precision air conditioning in servers and IT rooms and all technological applications in general. The INVERTER compressor allows the cooling capacity modulation according to the real internal load, particularly efficient at the partial loads, optimizing the power absorbed and eliminating the starting current. Electronic expansion valve and EC Inverter fans are fitted in this model as standard. External air condenser Emibyte equipment are fully designed and tested in the Emicon validation laboratories.

### CONTROL

Semi-graphic display 132x64 pixel, programmable software, record storage of 200 alarms, general alarm, automatic reset after blackout, integral LAN system, standby management, automatic rotation, serious alarms, operating contemporaneousness, clock function modality

### VERSIONS

D - DOWNFLOW AIR SUPPLY  
U - UP FLOW AIR SUPPLY  
F - FRONT SUPPLY (DISPLACEMENT)  
B - UP SUPPLY, REAR RETURN

### FEATURES

Unit for installing inside or outside the room to be air-conditioned. Maximum resistance to rust thanks to the galvanized sheet metal structures and panels with bevelled corner uprights to enhance its unique, clean and attractive design. The panels are lined with sound-insulating material to limit noise levels. Last generation of BLDC INVERTER compressor designed to deliver maximum cooling efficiency when you need it most. This latest variable speed compressor technology allows CRAC system manufacturers as Emicon to achieve superior performance. New generation EC Inverter centrifugal fan made in high class technological material with 5 backward curved blades. Impeller with bionic 3D profile thanks to an innovative design in the form of a blade geometry with specific buckling. Special V-shaped rear edge allows a wide characteristic field. Together with the rotating diffuser that opens, exceptional performances of the impeller and the entire system are thus obtained. In combination with the undulated surface of the blade surface, a diffused sound emission takes place which guarantees a very low noise level.

Standard COARSE 60% (ISO EN 16890) EU4/G4 filtering section is fitted. The filter is self-extinguishing. The microprocessor controls the compressor activation times thereby regulating the cooling capacity, it also controls the operating alarms with the possibility of interfacing to supervisor and remote-servicing systems.

Refrigerant circuit consisting of Electronic Expansion Valve, sight glass filter dryer on liquid line, pressure transducer with indication, control and protection functions on low and high refrigerant pressure, high pressure safety switch with manual reset, liquid receiver with accessories.

## DIRECT EXPANSION UNIT, WATER COOLED UNIT WITH ADDITIONAL FREECOOLING COIL & INVERTER

Close control air-conditioners for vertical installations and cooling only, with optional heating by means of heating element, optional humidifier and dehumidifier for precise temperature and humidity control. Particularly suitable for precision air conditioning in servers and IT rooms and all technological applications in general. Direct expansion FREE-COOLING unit with INVERTER compressor is water cooled and it has to be connected to a remote dry cooler. The INVERTER compressor allows the cooling capacity modulation according to the real internal load, particularly efficient at the partial loads and optimizing the power absorbed and eliminating the start current. Units fitted with electronic expansion valve and EC INVERTER fans, upflow or downflow.

### CONTROL

Semi-graphic display 132x64 pixel, programmable software, record storage of 200 alarms, general alarm, automatic reset after blackout, integral LAN system, standby management, automatic rotation, serious alarms, operating contemporaneously, clock function modality

### VERSIONS

D - DOWNFLOW AIR SUPPLY  
U - UP FLOW AIR SUPPLY  
F - FRONT SUPPLY (DISPLACEMENT)  
B - UP SUPPLY, REAR RETURN

### FEATURES

Unit for installing inside or outside the room to be air-conditioned. Maximum resistance to rust thanks to the galvanized sheet metal structures and panels with bevelled corner uprights to enhance its unique, clean and attractive design. The panels are lined with sound-insulating material to limit noise levels. Last generation of BLDC INVERTER compressor designed to deliver maximum cooling efficiency when you need it most. This latest variable speed compressor technology allows CRAC system manufacturers as Emicon to achieve superior performance. New generation EC Inverter centrifugal fan made in high class technological material with 5 backward curved blades. Impeller with bionic 3D profile thanks to an innovative design in the form of a blade geometry with specific buckling. Special V-shaped rear edge allows a wide characteristic field. Together with the rotating diffuser that opens, exceptional performances of the impeller and the entire system are thus obtained. In combination with the undulated surface of the blade surface, a diffused sound emission takes place which guarantees a very low noise level. Standard COARSE 60% (ISO EN 16890) EU4/G4 filtering section is fitted. The filter

is self-extinguishing. The microprocessor controls the compressor activation times thereby regulating the cooling capacity, it also controls the operating alarms with the possibility of interfacing to supervisor and remote-servicing systems.

Refrigerant circuit consisting of Electronic Expansion Valve, sight glass filter dryer on liquid line, pressure transducer with indication, control and protection functions on low and high refrigerant pressure, high pressure safety switch with manual reset, liquid receiver with accessories.

Thanks to the double coil (Free-cooling water and Direct Expansion) the unit provides the highest saving match with full availability of the DX solution. The usage of Free cooling coil and the BLDC Inverter compressor allows maximizing the saving in mixed mode operation, so whenever the free-cooling is not able to fully take the load the compressors can work just to complete the missing cooling needs. Therefore Emicon DXI-HF can provide extremely high energy saving granting the highest availability of the application.

## WATER COOLED UNIT

Ductable close control air-conditioners for vertical installation and cooling only, with optional heating by means of heating element, optional humidifier and dehumidifier for precise temperature and humidity control. Particularly suitable for precision air conditioning in servers and IT rooms and all technological applications in general. Units fitted with EC INVERTER fans, upflow or downflow. These units are provided with 2 way modulating valve and servomotor. Unit has to be connected with an external chiller.

### CONTROL

Semi-graphic display 132x64 pixel, programmable software, record storage of 200 alarms, general alarm, automatic reset after blackout, integral LAN system, standby management, automatic rotation, serious alarms, operating contemporaneity, clock function modality

### FEATURES

Unit for installing inside or outside the room to be air-conditioned. Maximum resistance to rust thanks to galvanised sheet metal structures and panels with powder-coated paint finish. The panels are lined with sound-insulating material to limit noise levels. The reliability and functionality of the all parts are guaranteed by partners who are world leaders in their sector. NEW EC INVERTER fans with electronic commutation in order to maximize the energy saving and reducing the noise emissions. The fan section is contained within the machine and includes centrifugal fans with backward curved blades with wing profile, single suction and without scroll housings (Plug-fans), directly coupled to external rotor EC electric motor.

brushless type with integrated electronic commutated system and continuous variation of the rotation speed. Standard COARSE 60% (ISO EN 16890) filtering section is fitted. The filter is self-extinguishing.

Chilled water coil with copper tube and aluminium Blue-fins with hydrophilic coating treatment surface to reduce the pressure drops on the air side. Water circuit realized with pipes entirely coated with insulated material and bronze fittings, complete temperature probe and with 3-way modulating valve.

## WATER COOLED UNIT - LARGE MODEL

Close control air-conditioners for vertical installation and cooling only, with optional heating by means of heating element, optional humidifier and dehumidifier for precise temperature and humidity control. Particularly suitable for precision air conditioning in servers and IT rooms and all technological applications in general. Units consist of two modules the first housing the heat exchanger, usually placed over the floor, the second where EC inverter fans are fitted. Downflow air supply. These units are provided with modulating 2 way valve and servomotor. Unit has to be connected with an external chiller.

### CONTROL

Semi-graphic display 132x64 pixel, programmable software, record storage of 200 alarms, general alarm, automatic reset after blackout, integral LAN system, standby management, automatic rotation, serious alarms, operating contemporaneity, clock function modality

### VERSIONS

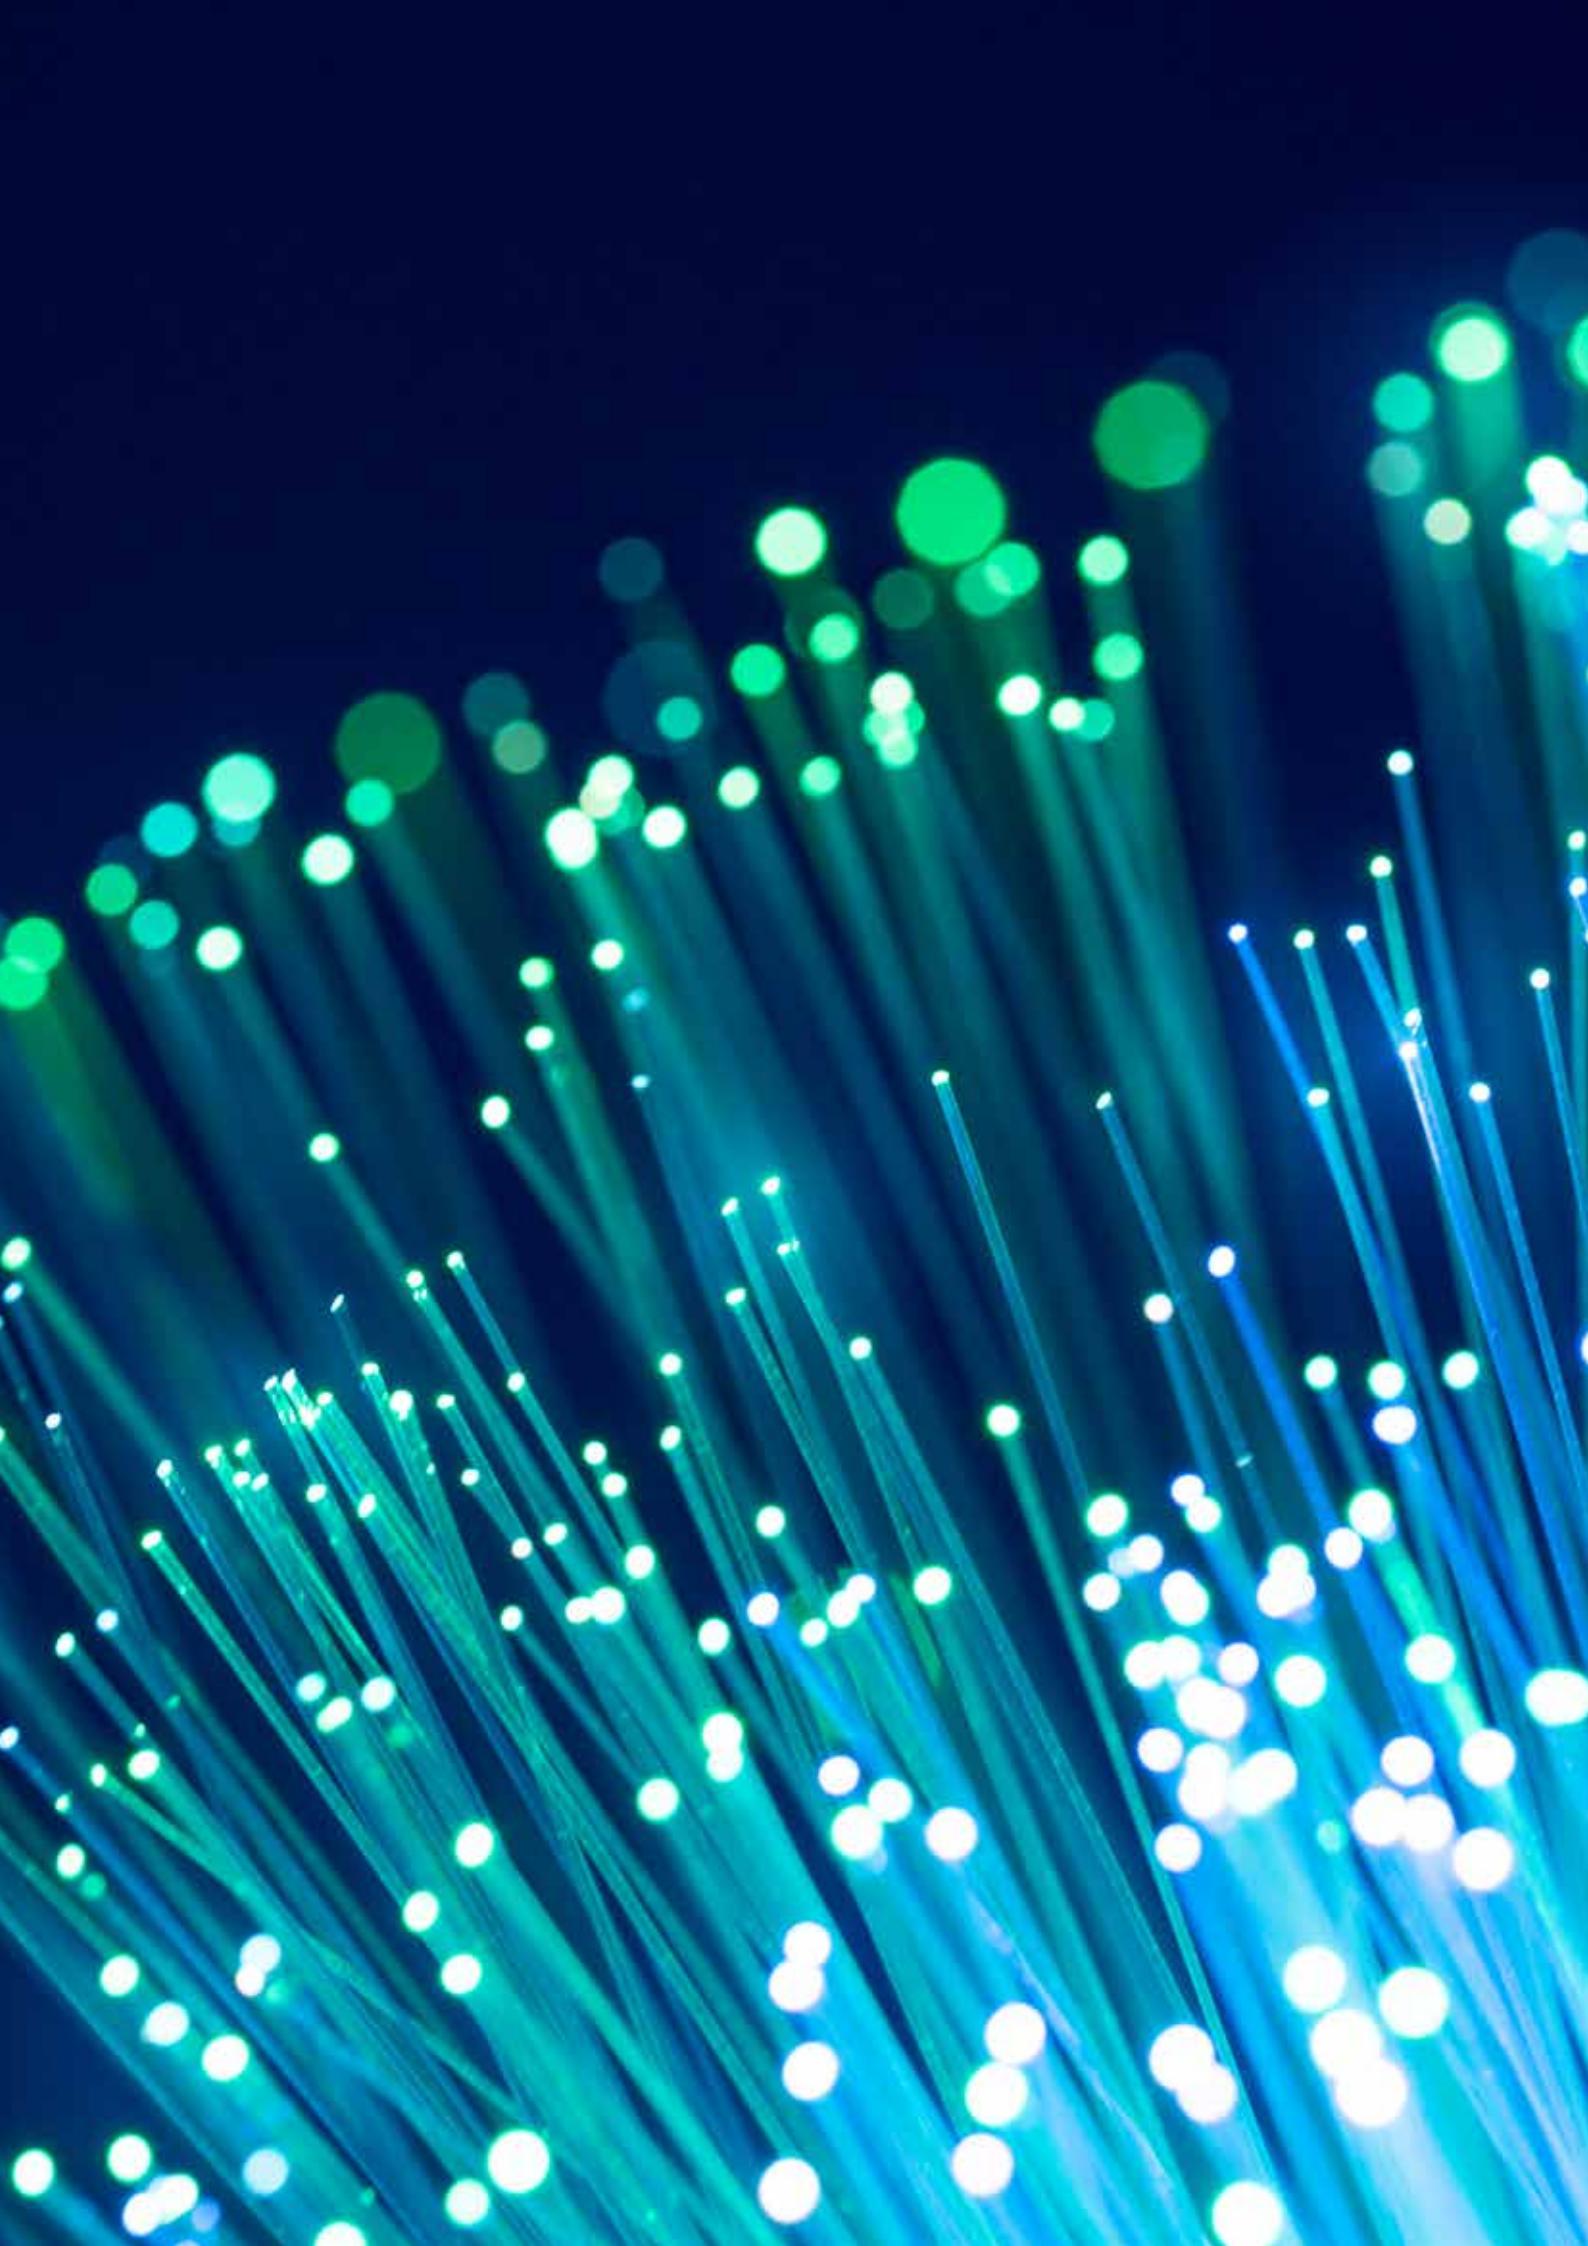

D - DOWNFLOW AIR SUPPLY  
U - UP FLOW AIR SUPPLY  
F - FRONT SUPPLY (DISPLACEMENT)  
B - UP SUPPLY, REAR RETURN

## 30cm - 60cm DIRECT EXPANSION

The indoor vertical air conditioning unit RACK COOLER is an effective management system of the Hot Spots in the data center, ensuring low energy consumption and usage possibilities even under extremely high loads for HIGH DENSITY rack up to over 40 kW/m<sup>2</sup> rack. The use of EC fan systems, featuring last-generation electronic-switching brushless motors, assures excellent performance and low consumption. Available as standard with the dynamic management of N+1 EC fans to optimize consumption and redundancy of the cooling system. Coupled with outdoor condensing unit air-cooled type with axial-flow fans, fitted with INVERTER-DRIVEN HERMETIC SCROLL compressor for operation on R410A refrigerant, available on versions BASIC and LT for low external temperature control, semi-graphic display 132x64 pixel, programmable software, record storage of 200 alarms, general alarm, automatic reset after blackout, integral LAN system, standby management, automatic rotation, serious alarms, operating contemporaneity, clock function modality.

### CONTROL

Semi-graphic display 132x64 pixel, programmable software, record storage of 200 alarms, general alarm, automatic reset after blackout, integral LAN system, standby management, automatic rotation, serious alarms, operating contemporaneity, clock function modality

### EFFICIENCY

The unit combines the efficiency of use of last EC fans generation and a direct expansion system with inverter compressor (fitted in condensing unit) allowing a great EER value. Thanks to the adoption of inverter DC brushless compressors, these units can reduce by 50% consumptions at part load, if compared to a traditional ON/OFF compressor. This is made possible also thanks to the advantages of variable air flow enabled by EC fans.

### FLEXIBILITY

The EMIBYTE INROW and Enclosure are both equipped with predisposition for passing refrigerant connections and power supply from both above and below, so as to allow a quick and easy installation in any condition, whether or not foreseen the presence of access floor.

### CONTROL MANAGEMENT

The units are supplied with a new management algorithm called xxxCARELxxx able to prevent stratification of temperature within the rack through the use of 4 sensors (2 on the suction and 2 on the outlet) integrated and independent on the basis of the real load in the single stratified BLADE work to optimize the ventilation only when required so as to maximize energy benefits. The EMIBYTE control also provides the optimal management of the outlet temperatures of the treated integrating the various resources in a DYNAMIC and INTELLIGENT way.

### MODULARITY

These units, with their characteristics of dimensional standardization based on the rack, are ideal for all those datacenters where SCALABILITY of the system is a strategic factor.

### COMPARTIZATION

Perfect integration with systems that minimize the mixing hot and cold air between the aisles and that emphasize the efficiency of such systems.

# IRWU

## 30cm - 60cm CHILLED WATER

The indoor vertical air conditioning units RACK COOLER 'IRUW' is an effective management system of the Hot Spots in the data center, ensuring low energy consumption and usage possibilities even under extremely high loads for HIGH DENSITY rack up to over 40 kW/m<sup>2</sup> rack. In hydronic version where the cooling is ensured by the use of an external chiller. The use of EC fan systems, featuring last-generation

electronic-switching brushless motors, assures excellent performance and low consumption. Available as standard with the dynamic management of N +1 EC fans to optimize consumption and redundancy of the cooling system. These individual units to be positioned between the racks in the row so as to act locally in order to dissipate the load of servers.

### CONTROL

Semi-graphic display 132x64 pixel, programmable software, record storage of 200 alarms, general alarm, automatic reset after blackout, integral LAN system, standby management, automatic rotation, serious alarms, operating contemporaneity, clock function modality

### EFFICIENCY

The unit combines the efficiency of a hydronic system for the extraction of heat with the use of last generation fans EC electronic commutated, to obtain values of EER more than 100. The reduction of the temperature of the air exhausted allows the use of water very high cooling 14-20°C by the Rack Cooler that, if on the one hand prevents unpleasant phenomena of condensation (SHR = 1), will allow the other use of only the external system in chillers Freecooling (TO BE ADJUSTED AS EMICON)

### FLEXIBILITY

The EMI-ROW and Enclosure versions are both arranged with hydraulics connections and electric supply from top or bottom side, so as to allow a quick and easy installation in any condition, whether or not foreseen the presence of a access floor

### MODULARITY

These units, with their characteristics of dimensional standardization based on the rack, are ideal for all those datacentres where SCALABILITY of the system is a strategic factor

### COMPARTIZATION

Perfect integration with systems that minimize the mixing hot and cold air between the aisles and that emphasize the efficiency of such systems

### INTEGRATION

With all the EMICON products such Perimetral CRAC-CRAH units and & IT Cooling Systems range via supervision software

# RCE / RCE-S [silenced]

## EXTERNAL CONDENSING FOR PRECISION AIR CONDITIONING UNITS

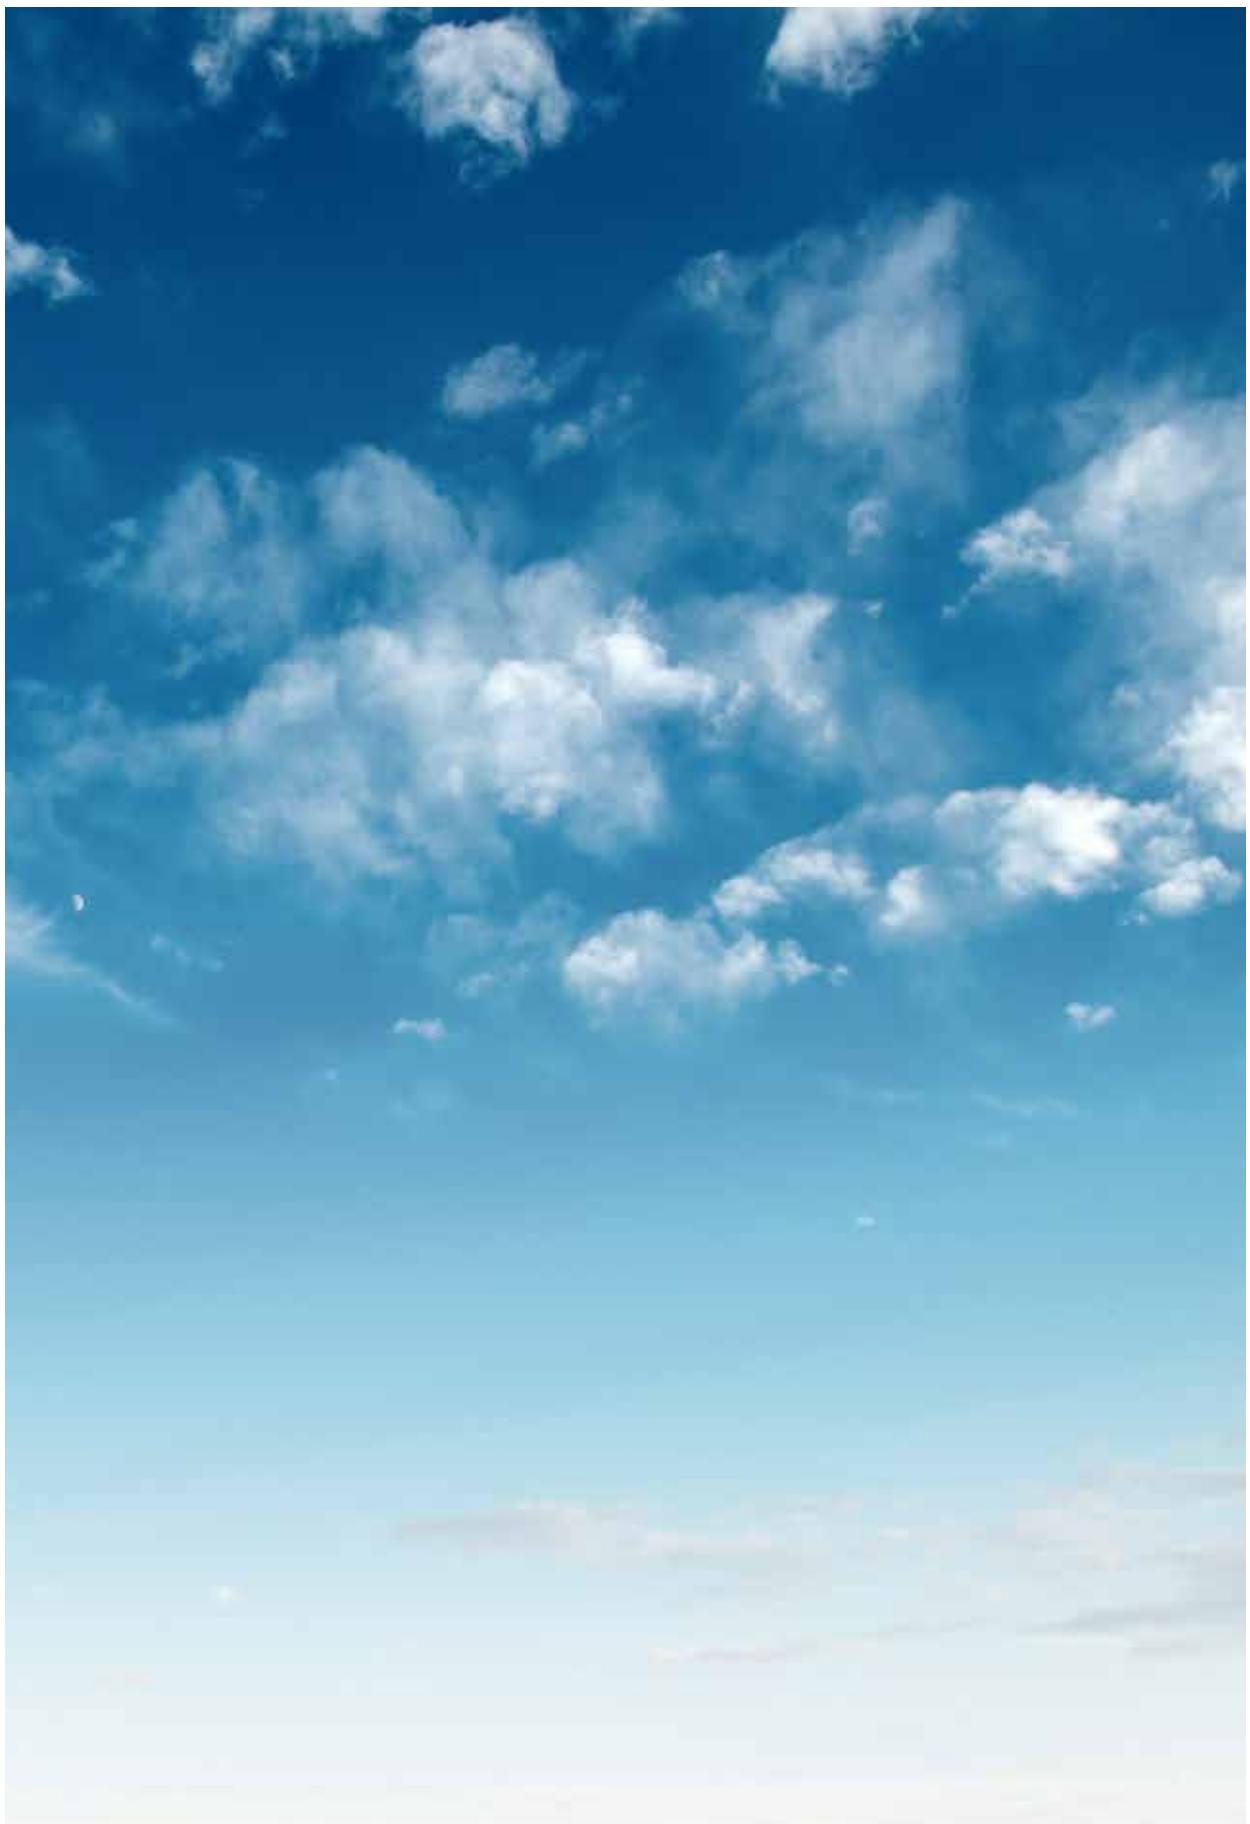

Remote condensers with axial-type fans for outdoor installation. Installation may be vertical with a horizontal air outflow or, using special brackets, horizontal with an upward air outflow. The very low noise, adjustable-speed fans are excellent for those projects where acoustical emissions play a central role. All models are available in Std version, low noise & super low noise configuration.

### FEATURES

Long concentrated effort in the new EMICON axial fan air cooled condenser with special configuration of fans with 'luvre' cuts which are positioned very closely together, capable of optimizing and increasing heat transfer performance, thanks also to the use of special high-efficiency tubes with internal grooves.

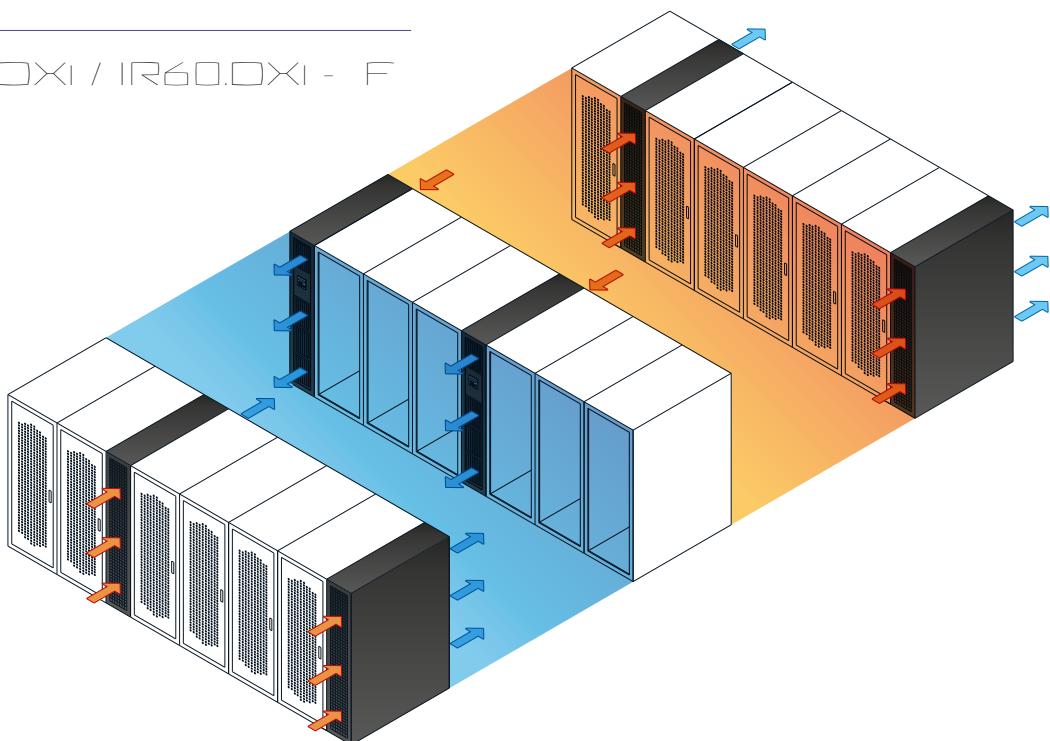

The new RCE-RCES remote condensers can be supplied with special Nanocoating protection which gradually slows down the deposit of dust and pollution on the fin surface, keeping the heat exchange surface clean and the maximum efficiency and giving an additional resistance against corrosion.

## FULLY CUSTOMIZABLE AND INTUITIVE TOUCH SCREEN DISPLAY

The new 4.3" touch screen designed to maximise the users system management experience. System usability is enhanced by the web server pages shown on the display relating to each individual controller connected to the network, allowing users to monitor the situation across the entire system from just one single location. Ethernet connectivity makes installation even more practical, without any constraints in terms of location relative to the monitored system.

Built-in temperature and humidity probe Can share the values read with both the display and the connected controller. This new feature means concrete advantages for the room terminal solution just one single device can be used, rather than two, to manage the function of both instruments

Micro-USB port  
At the front, concealed by a faceplate, for easier access

### INVERTER SCROLL COMPRESSOR

The best solution in terms of variable cooling capacity

### PRECISE TEMPERATURE CONTROL

Inverter compressor-based technology allows close monitoring and control of room temperature

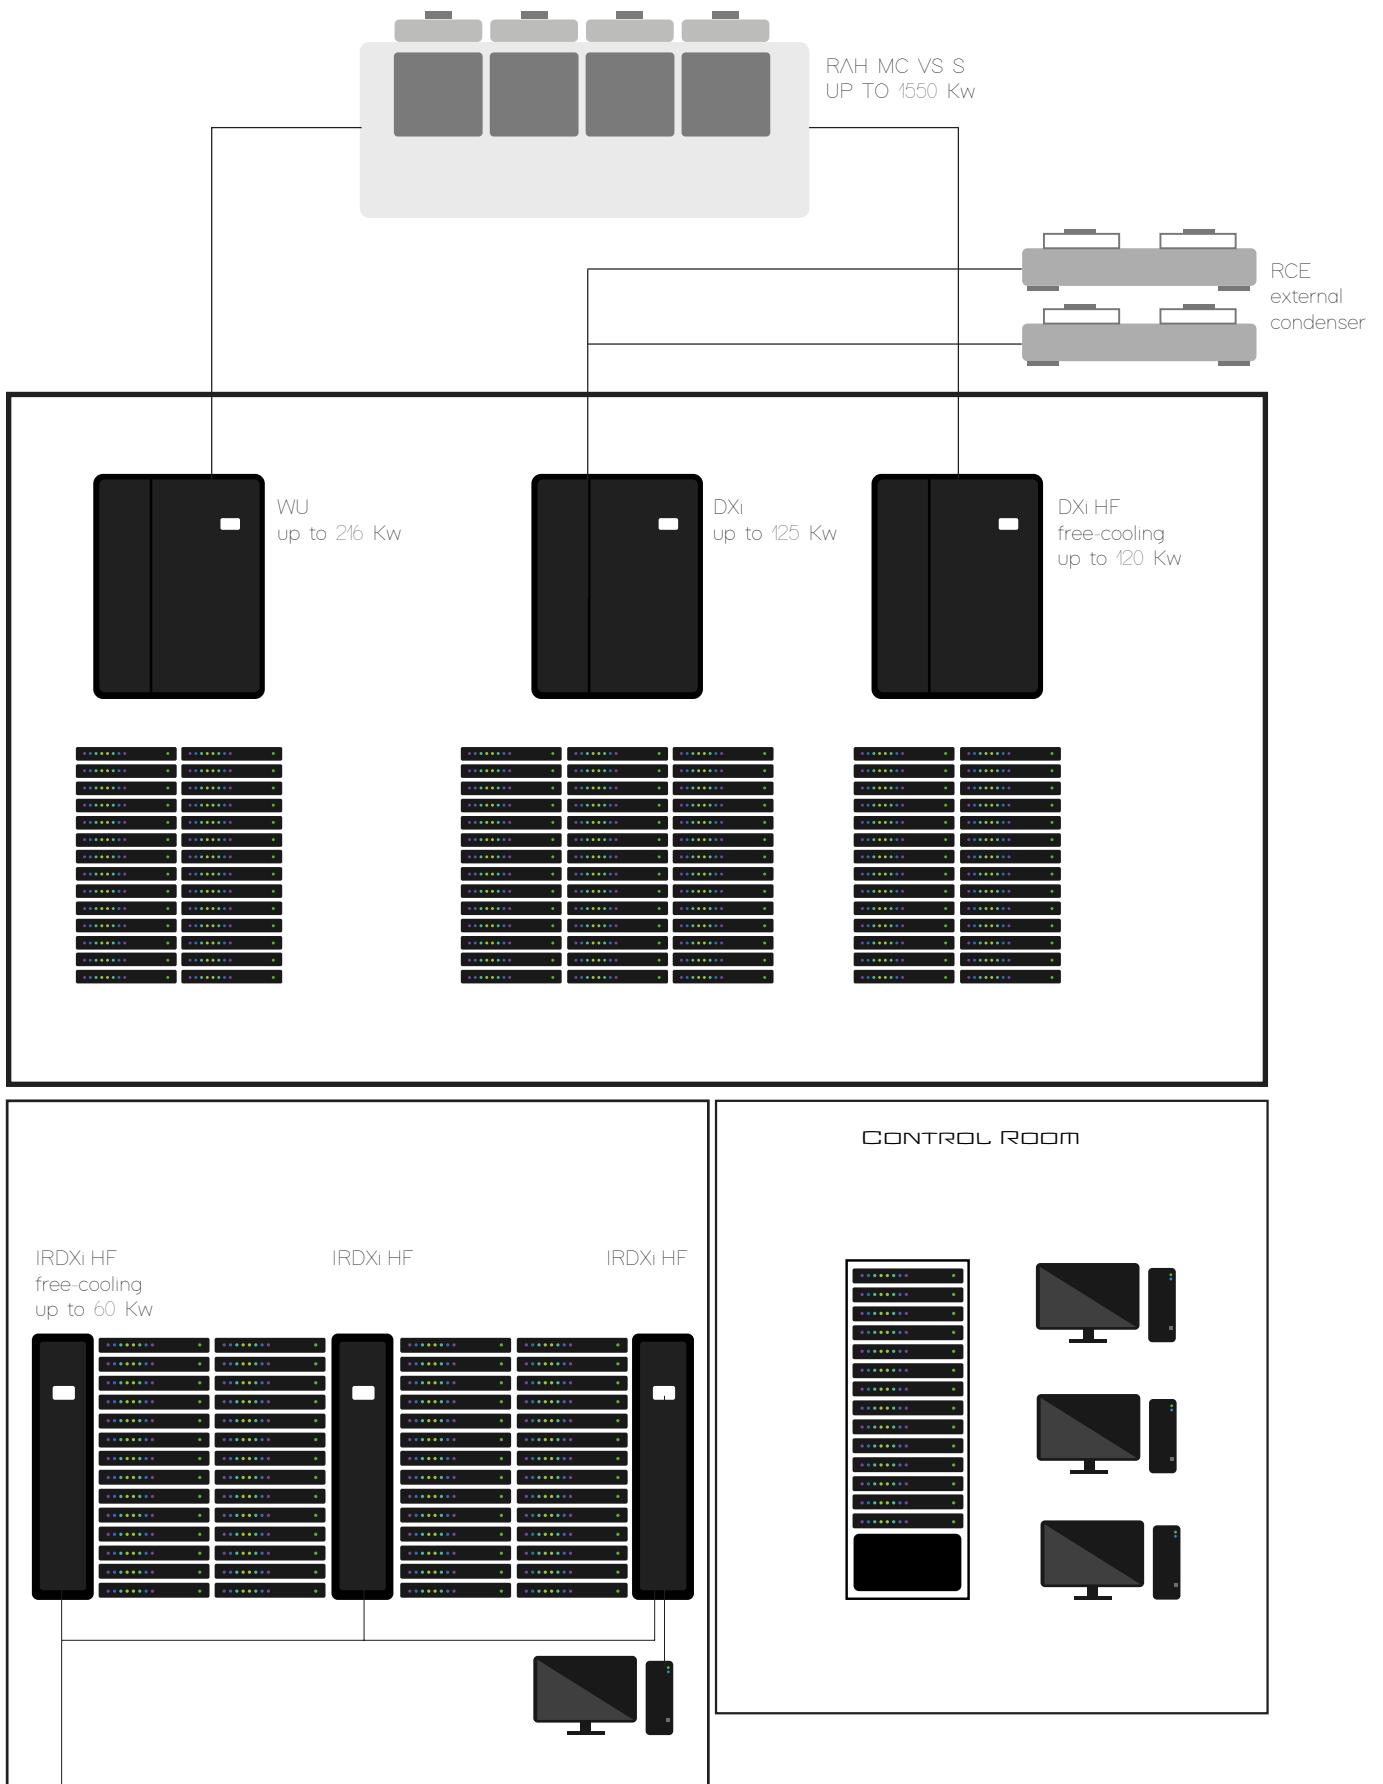

### EC PREMIUM FAN

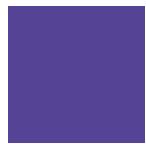

The new generation of Emicon EC Fan 2.0 is the core of EMIBYTE Precision Air Conditioner, significantly minimizing noise levels and increasing the efficiency of the unit

### ULTRASONIC HUMIDIFIER

This awesome optional get Perfectly-Controlled Humidity in Any Large Room or Storage Area. It can Maintain 10 to 90% Humidity at Low Temperatures with Antibacterial and Demineralization Processes for the Best Quality Moisture for Food Preservation, Museums, Antique Shops, Industrial Facilities and More. Ultrasonic Humidifier option is the new ultrasound cool mist large room humidifier. It has been developed to control and maintain the desired level of humidity for a specific environment constant.

The datas shown are indicative and may vary according to the components and external conditions.

(1) Performances are referred to the following conditions: Ambient temperature 35°C, Condensing temperature 50°C.

(2) Sound pressure level measured at 10 mt from the unit in free field conditions according to ISO 3744.

(3) Sound power level according to ISO 3744.

(4) Including support brackets.

(1) Performances are referred to the following conditions: Ambient temperature 35°C, Condensing temperature 50°C.

(2) Sound pressure level measured at 10 mt from the unit in free field conditions according to ISO 3744.

(3) Sound power level according to ISO 3744.

(4) Including support brackets.

**THE FOLLOWING DXI.HF/AF UNITS DATA ARE REFERRED TO  
THESE CONDITIONS**

- (1) Ambient temperature 24°C, Relative humidity 50%, water temperature 30/35°C.
- (2) The fans electrical power has to be added to the ambient load.
- (3) Free cooling: Ambient temperature 24°C, Relative humidity 50%, water inlet temperature 7°C, constant water flow
- (4) Water temperature 40/45°C, Ambient temperature 20°C, Relative humidity 50%.

Performances are referred to the following conditions:

(1) Ambient temperature 24°C, Relative humidity 50%, Water temperature 30/35°C.

(2) The fans electrical power has to be added to the ambient load.

(3) Water temperature 40/45°C, Ambient temperature 20°C, Relative humidity 50%.

**WATER UNITS**

(1) Ambient temperature 24°, Relative humidity 50% , Water temperature 7/12°C

(2) The fans absorbed electrical power must be added to the ambient charge.

<b>Humidifier</b>					
Steam production (nominal)	kg/h	3	5	5	5
Steam production (max.)	kg/h	3	8	8	8
Max. absorbed power	kW	2,25	3,75	3,75	3,75
Max. absorbed current	A	10,0	5,5	5,5	5,5
Specific conductibility at 20°C (min/max)	µS/cm	300/1250	300/1250	300/1250	300/1250
Total hardness (min/max)	mg/l CaCO <sub>3</sub>	100/400	100/400	100/400	100/400
<b>Electrical heaters</b>					
Steps	n°	1	3	3	3
Power	kW	3,0	9,0	9,0	9,0
Absorbed current	A	4,3	13,0	13,0	13,0
<b>Condensing water pump</b>					
Nominal flow	l/h	390,0	390,0	390,0	390,0
Max. flow (prevalence = 0 m)	l/h	500	500	500	500
Max. discharge height (flow=0 m <sup>3</sup> /h )	m	5,4	5,4	5,4	5,4
<b>Condensing water pump + humidifier</b>					
Nominal flow	l/h	600	600	600	600
Max. flow (prevalence = 0 m)	l/h	900	900	900	900
Max. discharge height (flow=0 m <sup>3</sup> /h )	m	6,0	6,0	6,0	6,0
<b>Dimensions and weight</b>					
Width	mm	300	600	600	600
Depth <sup>(3)</sup>	mm	1100	1100	1100	1100
Height	mm	2000	2000	2000	2000
Weight	kg	180	245	250	260

(1) Ambient temperature 38°, Water temperature 7/12°C

(2) The fans absorbed electrical power has not be added to the ambient charge.

(3) In LL, LR and CL versions, the depth is 1200 mm.
