Circular regulating valves for plenum boxes type CRC

Air regulating valve to be applied in circular plenum box connections to modify pressure and airstream towards diffusers.

Brand

- Cairox

Application

- Regulating valve for regulation of air streams in diffuser plenum box connections

Material

- Galvanized steel

Composition

- Galvanized steel plain blade with free passage of 20% under and above the blade when fully closed.
- Threaded axle rod with handle, ring and butterfly nut to adjust the blade position when mounted. The position of the blade is still visible from the outside.
- Axle with spring for easy fixing of the blade in pre-drilled holes of the duct connections.

Mounting

- To be mounted in the rubber end caps provided in the pre-drilled holes of the plenum box connection

Order example

- CRC, 160

Explication

CRC = Type of valve

160 = Connection diameter
