

- Accessories for multi-leaf dampers
- Actuator plate

Lateral actuator mounting plate type AMP

Actuator for servomotor mounting in the air flow

Application

- For mounting of actuators inside ducts due to lack of space.
- For installation of dampers in shafts
- For mounting of dampers in wall openings
- In settings where maximum transmission is required

Material

- Mounting plate, axles and transmission in galvanized steel
- Bearing in PTFE

Mounting

- Only available when ordered, premounted on standard dampers
- Damper flange will always be made 38 mm at multileaf damper at the side of the mounting plate

Prices

- Standard type for BELIMO actuators: 180€
- The type of actuator should always be specified when ordered
- Mounting plates for other actuators available upon request
