

## VRS-M

- Circular
- Galvanized steel
- Motorized 24V or 230V

## Motorized Constant air volume control dampers type VRS-M

Motorized CAV controllers for flow control at 2 constant air flows. The minimum and maximum flow can easily be set. To be used for controlling the airflow at a pressure between 50 and 1000 Pa.

### Application

- For flow control in ventilation and air conditioning systems at 2 set flow rates ( $V_{min}$ - $V_{max}$ ) with the following duct sizes and air volumes
  - Ø80: adjustable between 40 & 125 m<sup>3</sup>/h
  - Ø100: adjustable between 70 & 220 m<sup>3</sup>/h
  - Ø125: adjustable between 100 and 280 m<sup>3</sup>/h
  - Ø150: adjustable between 170 and 450 m<sup>3</sup>/h
  - Ø160: adjustable between 180 & 500 m<sup>3</sup>/h
  - Ø200: adjustable between 250 & 900 m<sup>3</sup>/h
  - Ø250: adjustable between 500 & 1600 m<sup>3</sup>/h
  - Ø315: adjustable between 800 & 2800 m<sup>3</sup>/h
  - Ø355: adjustable between 900 & 3200 m<sup>3</sup>/h
  - Ø400: adjustable between 1000 and 4000 m<sup>3</sup>/h
- Accuracy: +/- 10% of the set air volume

### Material

- Galvanized steel housing
- Aluminium regulation blade with piston and spring
- Mechanism for positioning with scale for setting the minimum and maximum air flow

### Composition

- Round housing made out of laser welded galvanised steel in standard duct sizes according to DIN EN 12237
- Airtight connection up to class D with EPDM rubber according to DIN EN 12237
- Balanced self-regulating aluminium blade with PTFE bearing and piston to prevent oscillations
- Adjustable scale
- Servomotor 24V or 230V for  $V_{min}$  -  $V_{max}$  flow setting with mechanical end stops.

**Technical data**

- Nominal voltage: AC / DC 24 V or AC 230 V
- Nominal frequency: 50/60 Hz
- Power consumption Ø80 - Ø250
  - In operation: 1.5 W @ nominal torque CM230-L / 0.5 W @ rated torque CM24-L
  - At rest: 1 W CM230-L / 0.2 W CM24-L
  - For measuring wires: 3 VA CM230-L / 1 VA CM24-L
  - Cable 1m, 3 x 0.75 mm<sup>2</sup>
- Power consumption Ø315 - Ø400
  - In operation: 1.5 W @ rated torque LM230A / 1 W @ nominal torque LM24A
  - At rest: 0.5 W LM230A / 0.2 W LM24A
  - For measuring wires: 3,5 VA LM230A / 1,5 VA LM24A
  - Cable 1m, 3 x 0.75 mm<sup>2</sup>
- Direction of rotation: depending on circuit CW or CCW
- Angle of rotation: limited on both sides by adjustable, mechanical end stops. The actuator is protected against overload, requires no limit switches and stops automatically when the end stop is reached
- Torque CM-L: 2 Nm, Torque LM A: 5 Nm
- Rotation time CM-L: 75 s / 90 °, Running time LM A: 150 s / 90 °
- Noise level: max. 35 dB (A)
- Designation position: mechanical, pluggable
- Integrated magnet for manual operation (magnetic gear release)
- Protection level: IP54 in every mounting position
- Ambient temperature range of servomotor during operation: -30 ... 50 °C

**Mounting**

- Set minimum and maximum flow rates by setting the mechanical end stops of the servomotor according to the scale
- To be inserted at both sides into a round duct and to be equipped with a silencer if necessary
- Horizontal or vertical mounting

**Accessories**

- Insulation shells available upon request

**Text for tender**

- The regulation of the airflow of the duct network is done by means of motorized valves for constant air volume control for Vmin - Vmax switching. The round controlvalves are constructed from a galvanized steel laser welded tunnel in which an aluminum control valve with rotating blade is incorporated. It controls the airflow with a constant flow rate within an operating range between 50Pa and 1000Pa. The regulator is resistant to varying pressures in the duct and is provided with an airtight maintenance-free bearing made of PTFE. The air flow rate is preset at the factory, but can be adjusted manually. The calibrated scale outside the regulator allows very accurate adjustment of the flow. The valves are available in duct diameters 80, 100, 125, 150, 160, 200, 250, 315, 355 and 400. The control valves are mounted between 2 channels where a rubber double lip seal provides an air-tight connection to air-tightness class D with the duct.
- Cairox Type VRS-M

**Order example**

- **VRS-M, 125, 24V**

Explanation

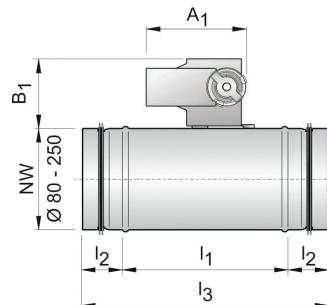

**VRS-M** = Type of constant air valve

**125** = Duct diameter

**24V** = With actuator CM24-L (24V)

**Other available products**

- Stainless steel models available on request
