

Stainless steel self-drilling screws type SSDS

Self-drilling screws with square hole in stainless steel INOX304

Brand

- Sufix

Application

- Screws **SSDS** are designed to assemble galvanised steel 2 sheets up to times 1,5 mm each together in a single operation
- The screws are made out of stainless steel INOX304 to avoid corrosion of the screws when used outdoors
- Not to be used in combination with steel plates as the screws will damage as they are made in stainless steel, being softer than steel

Material

- Stainless steel A2 / RVS304
