

Construction glue based upon MS Polymer type TEC7 X TACK

Tec7 X-Tack (290 ml) is a strong adhesive sealant based on MS polymers. Thanks to the extremely high initial strength of no less than 600kg/m², this adhesive sealant can be used in many situations and is suitable for use on most building materials. The X-Tack is safe to use on mirrors and leaves no marks on natural stone.

Brand

- TEC7

Application

- Can be used on most building materials
- Resis, airtight construction, sanitary

Specifications

- Basis: MS polymer
- Packaging : cartridges of 290 ml
- Specific weight: 1.49 g/cm³
- Viscosity: hard paste
- Shore hardness (DIN 53505) after 3 weeks at 23°C/50% relative humidity: +/- 54 Shore A
- Shrinkage (DIN 52451): approx. 5%
- Density (DIN EN 27390): does not sag up to a 40 mm thick joint
- Elongation at break: > 500%
- Modulus at 100% elongation 23°C (DIN 53504 S2): 1.0 N/mm²
- Tensile strength (DIN 53504 S2): 2.2 N/mm²
- Skin formation: 3-5 minutes
- Hardening time:
 - 24h - 2.7mm
 - 48h - 4mm
- Temperature resistance: -40°C to +90°C
- Processing temperature: from +5°C to +40°C
- Chemical resistance:
 - good: water, salt water, aliphatic solvents, oils, greases, diluted organic acids and lyes
 - moderate: esters, ketones and aromatics
 - poor: concentrated acids and chlorinated solvents
- Weather resistance: perfect
- Shelf life: 15 months in closed, original packaging

- Safety measures: please read the safety data sheet

Characteristics

- Already super-strong before curing: 600kg/m²
- Stable with adhesive thickness of up to 40 mm
- Permanently elastic
- Free of phthalates, solvents and isocyanates
- Safe on mirrors, no markings on natural stone
- Almost odourless
- Even on wet, slippery surfaces
- Fungus and bacteria resistant
- Water and airtight
- Can be used on most building materials

Accessories

- Cleaning wipes, type **CLEANERS**
- Multi purpose cleaner, type **TEC 7 CLEANER**
- Gun, type **GUN 18**
