

- Galvanised steel frame with filtermedia
- Filterclass G4 - Coarse 65%
- Length 360 mm

Bag filter G4 type BAG4

Bag filters with filter class G4 - Coarse 65% ISO 16890

Application

- Air filtration in air handling units and diffusers

Characteristics

- Yield according to EN779: G4
- ISO 16890 Coarse 65%
- High dust collection
- Progressive build-up of the filter medium
- Low pressure loss by conical bags
- Low power consumption and economy
- Designated final pressure drop: 250 Pa
- Maximum temperature at continuous working: 80 ° C
- Relative Humidity: 100%

Colour

- Galvanized steel with white filtermedia

Composition

- Medium: thick synthetic cloth with progressive build-up
- Conical sewn bags for low pressure loss
- Frame: Galvanized steel

Mounting

- To be inserted in filter traps

Order example

- **BAG4 287x592x360MM**

Explanation

BAG 4 = Type filter G4 - Coarse 65%

287 = Filterwidth in mm

592 = Filterheight in mm

360MM = Filterbag length in mm

BAG4	Dimensions			
	A [mm]	B [mm]	C [mm]	#BAGS
BAG4 287 X 592 X 360 MM G4	287	592	360	3
BAG4 592 X 592 X 360 MM G4	592	592	360	6
