

Ventichape flexible hoses type FLEXBLACK

Flexible duct made of hard PE, 1 roll = 50 m

Brand

- Ventichape

Application

- Appropriate for domestic ventilation
- Flexible duct to connect the central collector and the subcollectors with each other
- The length of the flexible duct between the central collector and the subcollectors cannot exceed the length specified in the table below in order to reduce pressure loss

Composition

- Pure PE (polyethylene), prevents odours and has no physiologic disadvantages
- No dangerous emissions causing unpleasant odours
- No production of wastewater
- Extra smooth inside, prevents pollution. There is few air resistance in the ducts

Features and benefits

- Emission free
- Antistatic and antibacterial
- Enormous compression strength and very stable
- Easy to clean and to handle
- 100% recyclable, in case of combustion no dangerous particles will be emitted
- Reduced pressure loss and high sound attenuation
