

Rectangular Y-pieces type KTL Y 204x60

Rectangular Y-piece, 204 x 60 mm (W x H)

Brand

- Ventichape

Application

- The metal Y-piece is used to make a bifurcation with a rectangular duct. It is mainly used to reduce the air resistance compared with a traditional T-piece. The connection with the rectangular duct has to be made by means of 3 connection pieces **MDF**.

Composition

- Rectangular Y-piece made of coated KTL steel; thanks to this KTL coating, the Y-piece is resistant to the corrosive elements of the cement screed (compression strength 80 kg/cm²)
- The KTL coating is also dust and moisture repellent, which makes it very appropriate for ventilation applications
