

Rectangular bends type KTL BDV90

Rectangular vertical bend 90°

Brand

- Ventichape

Application

- The vertical bend of 90° is mainly used to integrate rectangular ducts into a wall starting from the floor (or cement screed). It is also equipped with an air conductor to reduce the air resistance. Connection with other rectangular connection pieces is made with **MDF** connection pieces.

Composition

- Rectangular vertical bend of 90° made of KTL coated steel (5µm); thanks to this KTL coating, the bend is resistant to the corrosive elements of the cement screed (compression strength 80 kg/cm²)
- The KTL coating is also dust and moisture repellent, which makes it very appropriate for ventilation applications.
