

Accessories - Drain pump type UTR-DPB24T

Brand

- Fujitsu

Product

- Drain pump

Applicable indoor units

- Type **ABYG LRTE/LRTA**
- Type **ABYG 30/36/45/54 GATH**

Features

- The Drain Up Mechanism is used by assembling it with a ceiling type room air conditioner.
- The Drain Up Mechanism cannot be used alone.
- It can rise-up the condensate for a maximum of 300mm (from top of the unit).
- Give the drain pipe a down gradient of 1/25 to 1/100.
- Install the drain pipe so there is no rise, trap, or air bleeding.
- When using the Drain Up Mechanism, the connection pipe outlet direction is up only.
- Make sure the wire (Drain pump) into PCB CN6 and the wire (Float switch) into CN15 are connected on the indoor unit.
