

Anti-frost heater type AFR

Anti-frost heater with thermostat integrated to keep the condensate trays of condenser units frost free. Thanks to the integrated no-freezing thermostat the circuit switches on automatically under a specific temperature.

Supplied ready for use. It cannot be shortened.

Application

- condensate trays

Specifications

- Working temperature of the thermostat: +/- 3°C - +/- 8°C.
- Power supply: 230V/1Ph.
- Operating temperatures: -40°C to +130°C
- Power: 40 W/m
- Length (mm)
 - heating part: 2000 mm
 - Cold part: 1000 mm
 - Total length: 3000 mm
 - Diameter: +/- 5,5 mm
