

Mounting frame "DSB" type DSB

Universal mounting frame to support ducts, pipes and any other part of the installation. The maximum load capacity is 150 kg.

Application

- Cooling pipes
- Mounting ducts
- Ducts

Composition

- Kit for the construction of a mounting bracket
- 2x foot, made of fiberglass reinforced plastic with supporting surface of 310 x 310 mm
- 2x anti-vibration block of 300 x 300 mm for mounting under the feet to prevent damage to the roof or floor surface and providing vibration resistance
- 2x Galvanized steel vertical rails of 41 x 41 x 2.5 and length of 600 mm mounted on the feet and with plastic caps on the ends, to prevent injury
- 1x Galvanized steel cross rails of 41 x 41 x 2.5 mm in length 600 mm with 2 corner supports
- Kit with all the bolts, brackets and bolts, with the exception of the channel or device fixation

Advantage

- Quick to install
- Adjustable height
- Independent removable feet for a quick and easy maintenance
- Modular structure
