

Anti-vibration attenuators type AVD

Vibration attenuators for condensor groups

Specifications

- Load per set: AVD 85 = 90 - 200 kg / AVD 125 = 100 - 350 kg
- Wire: M8
- Set off 4 pieces
- Anti-vibration devices with controlled flexion are obtained by 2 separate components able to attenuate the shock, to isolate the noise and to reduce 85% of the frequencies of 15 Hz
