

Anti vibration tiles type MPI VIB

Black anti-vibration pads of 300 x 300 mm with a decreasing thickness of 30 mm to 15 mm, resulting in a slope of 5°. The pads are made of recycled SBR rubber. Ideal for protecting the roof membrane.

Application

- Mounting under condensor units and fan boxes
- Mounting under modular mounting frames **CFMA**

Specifications

- Density: 850 kg/m³
