

## Condensate drain hoses type ADP96

Flexible ribbed drainage hoses 16 / 18 mm in ivory colour

### Application

- Drainage of air conditioning condensation water (without pressure)
- Recommended installation of the drain pipe / hose inside a trunking or duct part

### Specifications

- UV stabilized PELD
- Temperature range 0°C to +50°C
- We can only recommend that positive temperatures (min. above +0°C) should be considered to avoid that, in case of accidental water stagnation, ice formation could possibly damage the drain pipe (or drain hose) and perhaps other components
- Connects to 16 mm, 18 mm and 20 mm diameter air conditioning condensation exhaust adapters
- Cutmarks each meter between connections

### Length

- 50 m
