

Refrigerant recovery unit R32 and R410A type TRS600E

Lightweight recovery unit with a very powerful 2/3 hp DC motor for recovery of refrigerant gases including R32 and R410A. The device has an analog readout.

Application

- For the recovery of refrigerants such as R32, R410A, R22, R134A, R407c in refrigerant systems

Composition

- Durable polyethylene housing
- Analog gauges
- Bluetooth connection
- Comfortable handle
- Integrated manifold block
- Built-in suction filter
- Shut-off valves

Specifications

- Direct gas: 19.2 kg/h
- Direct liquid: 324 kg/h
- Push-pull liquid: 858 kg/h
- Consumption: 1000W
- Compressor: 2/3 hp (oil-free compressor)
- Supply voltage: 230V AC 50-60Hz
- Weight: 12.7 kg
- Global certificates: CE / TUV
- UL Certified to meet EPA regulations: AHRI standard 740-98
