

CO2 transmitter with 0-10V output and relay (with LED indication) type FCO2 RT-R(-L)

Room sensors for measuring carbon dioxide levels in air. They have a built-in relay with switching output.
Type (-L) with LED indication

Brand

Regin

Application

- For control of ventilation systems in function of the CO₂ concentration

Mounting

- Appropriate for wall mounting

Accessoires

- Transfo 230 / 24 V AC, type **TRAFO 15/D**

Technical data

- Supply voltage: 24V AC/DC ±10%
- Measuring range CO₂ : 0 - 2000 or 0-5000ppm
- Outputs : 0-10V or 4-20mA and relay 24V (max 1A)
- Measuring range temperature : 0 - 50°C
- Accuracy CO₂ : ±30 ppm (±3% of the measured value)
- Measuring principle CO₂ : NDIR (Non-dispersive infrared technology)
- IP 30
